

Temporary lifeline

Ligne de vie temporaire
Línea de vida temporal
Temporäre Absturzsicherung

Code N° LDV101/102

FALLPROTEC

December 2017

Description

The temporary lifeline is made of the following components:

- one ratchet
- one energy absorber
- two straps fitted with a protective sheath and triplex karabiners
- 20 metres of cable with diameter 8mm stranding 7x7

Advantages

- Fixed directly on round or square pillars
- Steel cable resisting to temperature changes
- Energy absorber integrated to the lifeline
- Particularly well suited for the industry, safety in phases of construction or sporadic uses
